

ECONOVA

ECOPURE

Whole-Home Water Filtration System

UNDERSTANDING WHAT YOU CAN'T SEE

What's really in your water?

Water is essential for life, but what's in your daily supply isn't always visible to the naked eye. Town water is disinfected with chlorine, which leaves taste and odour behind, while sediment, rust and scale particles travel through ageing pipes into every tap.

What contacts your skin in the shower is as much a part of your daily exposure as what you drink.

A whole-home filtration system treats water **where it enters your home** — one of the most impactful things you can do for your family's everyday water quality.

Cleaner, fresher water from every tap.

The four benefits of pure water

For your family, your home and your future.

01 HEALTH

Happiness begins with good health

Whole-home carbon filtration reduces chlorine, chemical tastes and odours, plus VOCs and pesticides - cleaner, fresher water for your family from every tap.

CHLORINE REDUCTION | VOC REDUCTION | 5 µm FILTRATION

02 BEAUTY

Because you are beautiful

Your skin absorbs what it contacts. Filtered whole-home water means a gentler shower - softer-feeling skin, less irritation and healthier-looking hair.

SOFTER SKIN | BETTER HAIR | LESS IRRITATION

The four benefits of pure water

For your family, your home and your future.

03 HOME

Protection for pipes and appliances

Sediment, rust and scale particles wear on your pipes, dishwasher, washing machine and hot water system. Filtering at the point of entry protects them all.

SEDIMENT PROTECTION

LONGER APPLIANCE LIFE

04 ENVIRONMENT

A cleaner choice for our planet

Every household switching from bottled water to whole-home filtration eliminates thousands of single-use plastic bottles annually - a simple choice that adds up.

LESS PLASTIC

LOWER COST

LOWER FOOTPRINT

COMPONENT BREAKDOWN · FHWR-3S1-20

Enclosure & frame

1. **Tool-free cover clip**
   Hold-and-press clip: no screws, no tools, no screw corrosion.

2. **Fully enclosed design**
   Protects the gauges, with a dedicated recess for the housing wrench.

3. **Stainless steel cover**
   Durable, UV-protective and corrosion-resistant, with a sleek modern finish.

4. **Stainless steel frame & reinforcement plate**
   Prevents pipe breakage during filter changes; tougher than plastic-only frames.

5. **Included back cover**
   For ground mounting, fully enclosing the housings. Included as standard

COMPONENT BREAKDOWN · FHWR-3S1-20

Built to last

1. **Stainless steel & glass gauge**
   Built for longevity, with UV protection and anti-corrosion features.

2. **Stainless steel connector**
   Heavy-duty for higher water pressures and more resilient than plastic. Anti-corrosion property prevents secondary contamination.

3. **Double O-ring**
   Dual seals for added leak protection and less water wastage.

4. **Full-size 20 × 4.5-inch housing**
   Double the water contact surface, extending filter life
   Food-grade material and no restrictive fittings — choose your own filter supplier.

Three stages of 5 micron filtration

Each stage progressively cleans the water before the final carbon stage.

STAGE 1

5 µm

PP-CC sediment + carbon composite

Traps sand, rust, silt and scale particles, starts chlorine reduction and protects the carbon blocks for longer filter life.

STAGE 2

5 µm

CTO carbon block

Dense coconut shell granular activated carbon for strong chlorine, taste, odour and chemical reduction, with extended contact time.

STAGE 3

5 µm

CTO carbon block — second carbon stage

Coconut shell granular activated carbon captures remaining chlorine, taste and odour in a second carbon pass. Sets the system's 5 µm nominal filtration.

Cleaner, fresher water at every tap, shower and appliance.

LIFETIME WARRANTY

Stay protected, stay pure, stay covered.

Your EcoPure system is covered for life — for as long as it runs on genuine ECONOVA filters, changed at the recommended intervals.

01 **Register**
Register after installation to record your install date and activate your lifetime warranty.

02 **Replace**
Fit genuine ECONOVA filters at the recommended intervals — by subscription, direct or via a distributor.

03 **Stay covered**
Each genuine filter change on schedule keeps your lifetime cover in force.

Warranty cover at a glance

	LIFETIME WARRANTY	STANDARD WARRANTY
Applies when	System is registered and runs on genuine ECONOVA filters, changed at the recommended intervals	Non-genuine filters are fitted, or filters are not changed at the recommended intervals
Covers	Frame, filter housings, gauges, stainless steel connectors and cover	As lifetime, plus O-rings
Period	Life of the system, for the original owner at the original installation address	12 months from the date of installation

CONDITIONS

Installation by a licensed plumber, with a dual check valve and a pressure limiting valve fitted to AS/NZS 3500.1 - the warranty is void without them - and operation within the stated limits. The lifetime warranty is not transferable. Filters are consumables and are not covered; O-rings and seals are covered for 12 months from installation.

HOW TO MAKE A CLAIM

Call 1300 196 390 or visit econova.com.au/warranty, with your registration details, installation date and proof of purchase. Repair costs must be approved by Econova before work is carried out.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. This warranty is in addition to those rights.

Filter schedule & specifications

FILTER CHANGE SCHEDULE

5 µm	**Stage 1 · PP-CC** Sediment + carbon composite	**6–12 months**
5 µm	**Stage 2 · CTO** Carbon block	**12–18 months**
5 µm	**Stage 3 · CTO** Carbon block, second carbon stage	**12–18 months**

Intervals are based on standard test conditions; replace sooner if flow drops, the gauge gap widens or taste returns.

No tools required

The hold-and-press clip and dedicated filter access space make changes simple. Genuine filters, changed on schedule, keep your lifetime warranty in force.

SYSTEM SPECIFICATIONS · FHWR-3S1-20

Water pressure	0.1–0.6 MPa
Water temperature	5–35 °C (cold only)
Iron	Max. 0.2 mg/L
TDS	<1800 mg/L
Treatment capacity	100,000 L
Flow rate	50–60 L/min
Dimensions	73 × 58 × 22 cm
Weight, in service	26.8 kg
Compliance	AS 3497 · WM-75284

Not designed to remove fluoride, dissolved salts, hardness minerals or viruses, and does not disinfect water. Actual performance varies with water quality, flow rate and filter condition.
